TALENT HUB FOR SUPPLY CHAIN

Blended Master of Engineering in Logistics and Supply Chain Management (ZLOGb)

The blended master's degree allows learners to combine the MITx Micro-Masters credential with one semester at Zaragoza Logistics Center in Zaragoza, Spain (and which will also include 3 week stay at MIT).

The MicroMasters credential requires a learner to successfully pass five rigorous online courses in supply chain management and also pass a proctored comprehensive exam.

This program requires the successful applicant to come to MIT for January and continue studies in Zaragoza through May.

“ZLOGb is a rare opportunity in this crowded world that provides a very short and convenient path to formal higher education. In collaboration with world-class academic institution like MIT, I have benefited from quality intellectual sources of both sides of the Atlantic. Being exposed into a rich cultural exchange during the program is also great for you to embolden your life experience and make friends all around the globe. The master degree has given me not only valuable knowledge but paved the way for me to advance in my career. I have been double-promoted to senior director level after graduation. That new position by itself, is another learning program that opens up the next level of continuous self-progression on the corporate ladder. I cannot recommend you to try anything but to apply yourself to this wonderful journey”.

Tai Ho, Vietnam

Senior Director, Supply Chain Solutions at TIKI Corporation

The Spanish experience

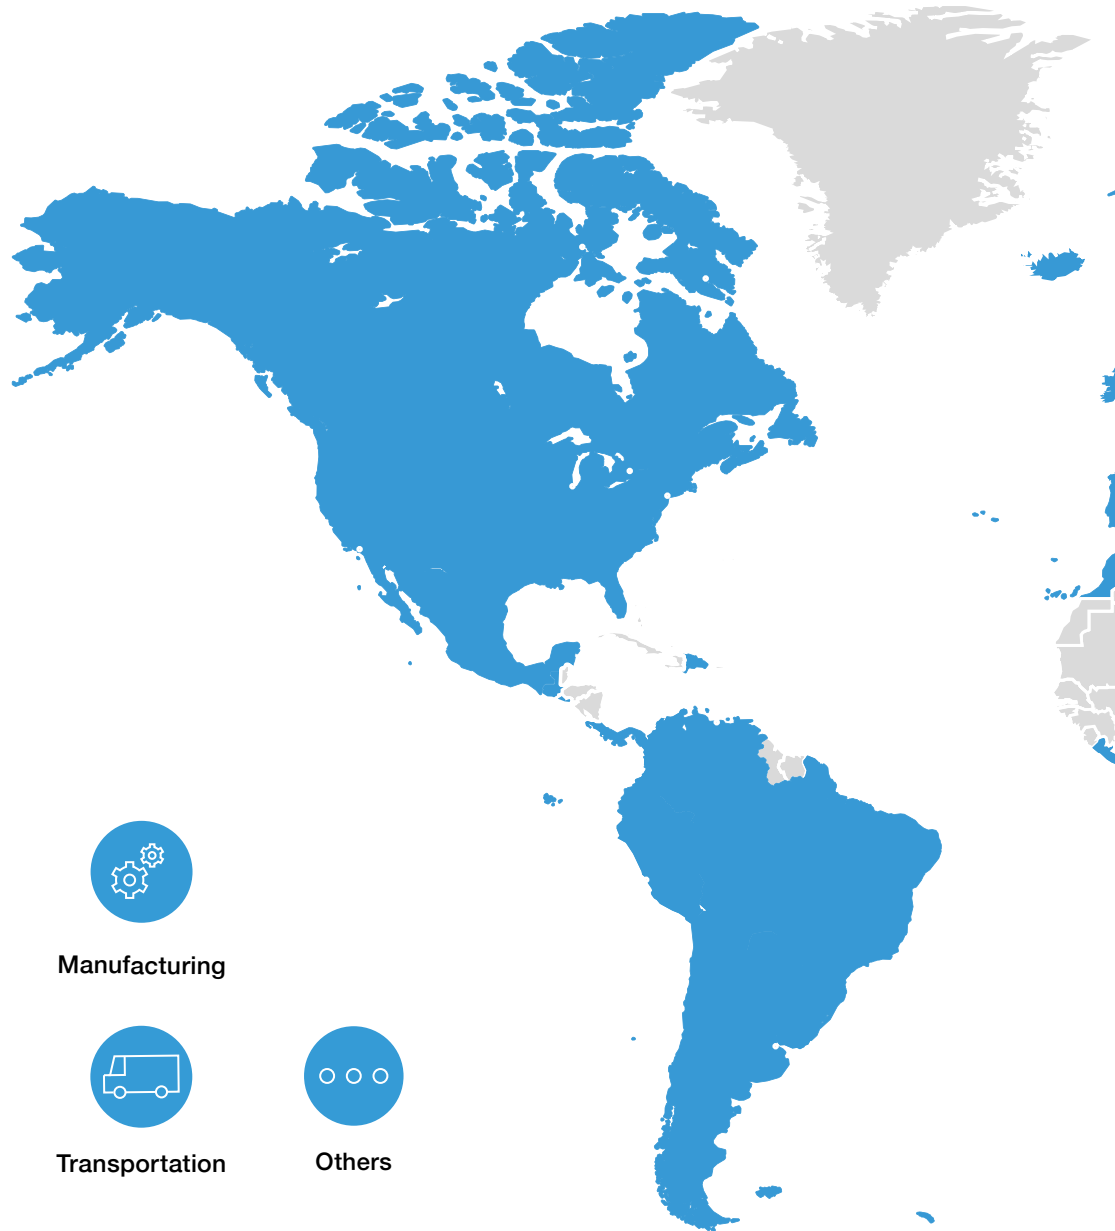

Spain is significantly cheaper than many other European countries. The people are warm and always ready to help in your wonderful journey ahead. Zaragoza, the 5th largest city in Spain, has all the conveniences of a big city without most of the drawbacks. The tapas experience is certainly unique! Within a 300km radius, you can be in Madrid, Barcelona, Valencia, or San Sebastián, as well as several low-cost flights to Spanish islands, London, Paris, Berlin, Rome, Amsterdam or other great European destinations.
